Plan Description of DELTA DENTAL COMPREHENSIVE

The value of dental insurance

Dental insurance makes dental care more affordable! With a focus on prevention, dental insurance typically covers professional services like routine check-ups, cleanings and exams at 100%. This helps reduce out-of-pocket costs, so you pay less for the dental care you need.

Improved overall health: Research shows good oral health has a positive effect on overall health and well-being. During an oral exam, your dentist can detect signs of 120+ diseases just by examining your mouth!

Encourage routine dental care for long term benefit: During preventive check-ups, your dentist is better able to detect problems early on and help you avoid more costly and complex procedures in the future.

Cost savings and budget management: Dental insurance helps you save money by covering up to 100% of preventive cleanings and check-ups and portions of more extensive procedures.

Coverage for the unexpected: Oral health problems can appear unexpectedly. Dental insurance makes it easier and more cost-effective to get the care you need so you don't have to worry about the future.
